The construction is: 1. Erect the cement block wall; 2. Into the wet-cement areas wire 'studs' stick out about 6" from the cement blocks; 3. Blue sheeting is 'hung' on these wire 'studs,' which protrudes out into the facing brick area; and 4. Facing bricks are then erected over the blue sheeting and presumably using the protruding 'studs' to guide the laying of the bricks." -- Donated in box from Admin Building (contact: Colleen McCreary), Fall 2007.	1 photograph : col. ; 15 x 10 cm.	1999	74
